

JANTZEN AUDIO DENMARK

realize your audio dreams

Superior Cap

Standard Cap

Primus Silver Cap

Our new Z-cap series have been blind tested by a number of serious audiophiles, and this is their opinion:

Jantzen Audio - Standard Caps are fast, smooth, detailed and less grainy compared to similar competitor Caps on the world market.

Jantzen Audio - Superior Caps are absolutely high-end components, delivering a natural, almost holographic soundstage. Even the finest nuances can be heard.

Jantzen Audio - Primus Silver Cap is a phenomenon: it has as a sonic base all the good characteristics of the Z - Superior Cap, but with some fantastic additional benefits - it sounds absolutely natural, nearly without audible coloration to the music signal, delivering an authentic soundstage. Besides, it is super smooth, without any harsh additions to the sound and the tonal balance is absolutely neutral. Sonically, it behaves more like a fine piece of wire than a capacitor. A truly outstanding audio part!

Jürgen Ultee, Germany.

Please note! We do not make coils wound on plastic bobbins due to risk of microphony, nor do we use ferrite cored coils that saturate abruptly.

All Jantzen coils are baked, producing rock-solid windings for optimized and persistent performance.

Experience the difference!
