

STANDARD Z-CAP™

The Jantzen Audio Standard-Z Cap™ is our entry level audiophile capacitor.

A capacitor that offers great value for money in its class. Fast reacting, smooth and detailed in sound, compared to other single foil PP capacitors.

HIGHLIGHTS

Single foil PP capacitor

Featuring extremely high quality German made foil, metalized with Aluminum and Zinc particles

Featuring terminal leads made from PCOCC copper (oxygen free)

Nitrogen filled instead of dielectric fluid, offering more foil per capacitor and eliminating risk of evaporation

TECHNICAL INFORMATION

- Zinc / Aluminum Metallized Polypropylene
- Voltage rating: 400V DC
- Non inductive construction
- Terminal leads are made from PCOCC copper (Pure Copper Ohno Continuous Cast Wire) (oxygen free)
- Capacitance tolerance : +/- 5%
- Loss factor: 1K 0.00002
- Non-polarized capacitor
