

SILVERGOLD Z-CAP™

The Jantzen Audio SilverGold-Z Cap™ offers unparalleled performance for the tweeter section of crossovers or for upgrading the capacitors in your amplifier.

Perfect resolution, fast reacting and a rich dynamic soundstage.

HIGHLIGHTS

Top of the range double foil super PP capacitor

Featuring extremely high quality German made foil, using metalized foil containing 99% silver and 1% gold particles. Terminal leads are made from pure silver

The ultimate luxury capacitor for tweeter sections on crossovers or for upgrading amplifiers

Nitrogen filled instead of dielectric fluid, offering more foil per capacitor and eliminating risk of evaporation

TECHNICAL INFORMATION

- Silver/Gold Metallized Polypropylene
- Metallization particles: 99%Silver and 1%Gold
- Non inductive construction
- Terminal leads are made from pure silver (1 mm in diameter)
- Capacitance tolerance : +/- 2%
- Voltage rating: 250 - 1200V DC
- Loss factor: 1K 0.00002 10K 0.00001
- Non-polarized capacitor
- Working Temperature Range: -30C to 105C
