

JANTZEN AUDIO

Disclaimer for the suitable application of Jantzen Audio products

- All Jantzen Audio products are only intended for application on passive speaker crossovers for home use and other home audio areas of application for home use
- For professional audio application, kindly contact us for a dialogue about application, as our products may not be suitable for use in all PA systems or other professional audio applications
- Our induction coils, capacitors and resistors are only tested for application on passive speaker crossover application or other home audio applications with similar voltage / ampere outputs
- If our products are used in other industries or fields of application than specified above, our product warranty will not cover damage to our products, other products, or collateral damage to anything related to the incorrect application of our products where they are not intended for use
- We do not offer advice or technical assistance if our products are used in any other application than specially outlined above
- **Custom induction coils:**

We only offer custom induction coils based on inductance (mH) and RDC (coil resistance Ω) target values.

We **do not** offer to make custom inductors based on number of turns, sizing (\emptyset / H / Inner \emptyset) or any other requirements not relating to inductance and RDC.

Kindly send all technical inquiries to:
