JANTZEN AUDIO

Troels Gravesen's Introduction:

A speaker specifically designed for placement in the corner of your listening room.

Simple as can be cabinet and a simple as can be crossover consisting of four components.

It also requires a simple set-up as the bass response is relying on room reinforcement – room-gain. Some people think less is more – but I disagree.

IMPORTANT!

Please read our sales terms to read about how the DIY kits are delivered and other important information.
