JANTZEN AUDIO

Troels Gravesen's Introduction:

The ambition here is to present a statement in modest sized 3-Way classics, no less.

I've had the opportunity to work with both 4 and 10 Ohms version of the 23I52 bass driver from Audio Technology, and I've been impressed every time; in particular when the voice coil is made from aluminum reinforced kapton, improving transient response (high Qm).

IMPORTANT!

Please read our sales terms to read about how the DIY kits are delivered and other important information.
