JANTZEN AUDIO

Troels Gravesen's Introduction:

Ekta Grande started in 2007 and has maintained a steady interest among builders – and for good reasons.

These Revelator drivers are among the most diy-friendly drivers ever made.

Smooth frequency response from appropriate front panels allow simple crossovers and excellent sound. The 12M middriver is a darling and an example of excellent performance and delicate industrial design.

IMPORTANT!

Please read our sales terms to read about how the DIY kits are delivered and other important information.
