# JANTZEN AUDIO

## Troels Gravesen's Introduction:

This speakers should have an Indian name and be called "Comes With a Room" (- like "Dances With Wolves") because this is what wide baffled speakers do.

They kind of bring in their own room. There's virtually no edge diffraction due to the wide baffle and the way these speakers recreate music in a room is special and to put it short: I like it!

They can play strings, woodwinds and rock'n roll like few speakers of this size and from a 91 dB/2.8V sensitivity they do well with small amps.

### **IMPORTANT!**
