## Troels Gravesen's Introduction:

The Revelator-3WC is the easier to build 3-Way classic stand-mount version of the Revelator-851 floor-standers.

Using Scan-Speak's Revelator drivers, we're already into high-end territory.

When we then add high-quality baked coils, Superior-Z and Alumen-Z capacitors, we go further into super-high-end territory.

A speaker is never going to sound better than what signal the crossover components allow to pass to the drivers and especially capacitors are a key ingredient in high-quality sound reproduction.

Hence, the Revelator-3WC only comes in one component version, as there were no compromises in components that I was willing to make.

### **IMPORTANT!**

**Please read our sales terms to read about how the DIY kits are delivered and other important information.**
