

JANTZEN AUDIO

SBA-861 PFCR

Designed by Troels Gravesen

Experience true HIFI starting from only EUR 280 (excl. VAT)*.

This was achieved by choosing drivers and crossover components carefully and with keeping cost in mind during the design process.

The cabinet construction is relatively easy and you will end up with a fairly large floorstander that delivers deep bas, exceptional transparent midrange and smooth treble.

*The EUR 280 includes the drivers, but not the cost of cabinet materials

JANTZEN AUDIO

This DIY kit can be delivered including:

- All drivers
- Some drivers (let us know which drivers you already have)
- No drivers

Drivers used in the construction:

2 x SBA SB20PFCR30-8 (Woofers)

2 x SBA SB16PFCR25-8 (Mid-ranges)

2 x SBA SB29RDAC-C000-4 (Tweeters)

JANTZEN AUDIO

General information:

- The prices mentioned in the pricelist are excluding shipping costs
- The “closed schematic” DIY kits can only be purchased directly from Jantzen Audio
- Schematics & values for the “closed schematic” DIY kits are **not** sold separately
- All crossover components must be purchased
- Drivers, Hypex, damping materials and accessories are optional (some exceptions)

Customization:

- We only offer to upgrade capacitors, no other component changes are possible

How the DIY kits are delivered:

- We do not offer pre-assembled crossovers
- Cabinet materials are not included
- We do not offer readymade cabinets or finished speaker systems

Build instructions include:

A printed instruction containing the component values list, the crossover schematic, a crossover component placement drawing and the wiring chart
