JANTZEN AUDIO

Troels Gravesen's Introduction:

The SEAS-NEXTEL-2F is the more economical way of experiencing the virtues of the updated SEAS Nextel coated drivers compared to the larger CNO-4.

Midrange clarity and crystal-clear treble, fed through state-of-the-art crossover components and as simple a crossover as possible.

Combined with the powerful Fatial 10" bass driver driven by the Hypex module allows you to do unlimited room adaption.

When placed in a corner, near-wall or out on the floor, the Hypex module allows you to adjust the bass performance to any room condition.

Fully passive version available should you not have any room constraints.

IMPORTANT!

Please read our sales terms to read about how the DIY kits are delivered and other important information.
