

Soundcare® SuperSpikes are an all-in-one solution combining the sonic benefits of spikes with the protection and ease of use and of a soft rubber or silicone foot.

The construction is based on a high quality self-adhesive SuperSpike and an ABS foot that make the SuperSpikes blend in just like regular feet for speakers and audio equipment.

The all-in-one solution allows the user to relocate speakers and other audio equipment easily without scratching or scarring the floor or surface.
