

## SEAS Curv

Designed by Troels Gravesen

*“Spending more than a year on Jantzen speakers, handling a small 8 liter speaker is quite a relief.*

*Only real challenge is placing the crossover in the small rear compartment, but more on this later.*

*Ever since the launch of the CURV cone material, reviewed in Voice Coil, October 2006, I’d wanted to try out a drivers made with this cone material.”*

## Speaker Units (Drivers):

**SEAS  
U16RCY/P  
Mid-woofers**  
(Can be bought with DIY kit)

**SEAS  
29TFF/W  
Tweeters**  
(Can be bought with DIY kit)

## Crossover component options (kit levels):

### Level 1:

#### Inductors:

Air & iron core wire coils

#### Resistors:

Superes resistors

#### Capacitors:

Tweeters: Superior Z-Caps

Midrange: Superior Z-Caps

## Crossover component options (kit levels):

### Level 2:

#### Inductors:

Air & iron core wire coils

#### Resistors:

Superes resistors

#### Capacitors:

Tweeters: Superior Z-Caps

Midrange: Standard Z-Caps

## What else is included in the DIY kit?

### Damping Materials included in the DIY kit as standard:

Damping felt  
Polyester damping cloth

### Accessories included in the DIY kit as standard:

Binding post terminals  
Port tubes (Bass Reflex)  
PFTE insulated silver infused cables for internal wiring  
Solder tag strips  
SuperFix component fastening glue  
Round head wood screws
